

Dear Members of the FCC, I am writing to you about a very sensitive subject: XM Satellite Radio. I fully support and have chosen to pay a monthly fee to enjoy my personal choices provided to me through XM Satellite Radio. I enjoy the variety and quality of the programming provided by XM Radio EVERY DAY of EVERY WEEK. In fact, XM programming is unparralled by any other radio available within my region. Please, please address the problems that the NAB is creating by seeking to stop XM from providing specific programming such as the instant traffic and weather in major metropolitan areas. Please, please continue to support solid competition as a means to control inappropriate manuevers such as NAB's petition 04-160. Please, please don't take away my freedom of choice. Sincerely, Mary C. Petersen
